

## Homework 3    Ionic app with cloud database (Firebase or Back4app.com) with Social Login and image saving

<http://parseplatform.github.io/docs/js/guide/>

Start with your ionic project of Homework3, add the following functionalities to it.

- 1) Add Facebook Login to your app
- 2) The Add button on the top right corner will allow user to input an order information  
**Add a camera button, so that it allows the user to take a picture and save it as an attribute of the order.** (so you need to add a file attribute named productimage)

your order should be saved to Cloud database

you can refer here: <http://stackoverflow.com/questions/23463012/how-to-save-an-image-in-parse-com-via-javascript>

### HOW TO SUBMIT:

Upload the two project files to <http://dropbox.cse.sc.edu>
